Aspera INSURANCE SERVICES

CONTROL OF WELL

Control of Well (COW) coverage is designed exclusively to protect oil & gas-related businesses from well-failure expenses. COW, also known as Well Control or Operator's Extra Expense (OEE), can prevent costly coverage gaps when standard General Liability and Property coverages exclude well coverage.

Aspera offers flexible limits and customizable options to ensure comprehensive coverage, whether your account has one well or many.

Use COW coverage with our Energy Property and Commercial General Liability products to build a comprehensive risk management strategy for oil & gas accounts.

TARGET CLASSES

- Lease operators
- Non-operators with working interest
- Drilling contractors
- Well-servicing/workover contractors
- Wells in all 50 states, including:
  - Saltwater disposal wells
  - Drilled wells only
